

What makes Welwyn Garden city special

By Sasha Wesener

I think that Welwyn Garden city is a special place because there are plenty of green spaces for people to go to. There are also a lot of outdoor activities to do in Welwyn like: fishing, canoeing, sailing, paddle boarding and lots more water sports. As well as all our water activities Welwyn Garden City has a nearby wood where you can go running or biking. There are also plenty of great public footpaths where you can go for a nice walk. My favourite one is the footpath around the golf course and Sherrardspark Wood.

Welwyn Garden City has a sports centre, which has a wide variety of sports like: football, tennis, lacrosse, a running track, cycling and tournament games. Outside of the sports centre there are a few rugby pitches that you can also go to.

In Welwyn Garden City most houses have a garden or some sort of green space and for people who live in a flat there is plenty of green fields and parks to go to.

The reason green spaces are important to you is that they are good for your mental and physical health as they are a great place to exercise or relax.

I am very grateful to live in a town that is full of green open spaces and that there is not much rubbish lying around everywhere. If I lived in a dirty grey city I wouldn't be as happy as I am now.
