

What I love about Welwyn Garden City

Welwyn Garden City is the second Garden City. It is a marriage of the countryside and a city. It was created and built by two men called Ebenezer Howard and Louis de Soissons. It is a green environment and I love it. The fountain and the trees don't make it look like concrete and bricks thrown together. All the flowers and hedges make it such a lovely place to live.

Sherradspark wood is one of Hertfordshire's largest and most important oak and hornbeam woodlands. It is one of my favourite places to be because it is such a calm place and if you sit still you can hear the bird song. I love watching the squirrels jumping up and down the trees and at night there will be foxes and nocturnal animals scurrying to collect their food.

Welwyn Garden City has a nice community feel because we have events regularly. This year we were going to have big plans for Welwyn Garden City's **100th** birthday. Usually we have a Christmas festival with lights ,food , performances. And we also have street markets in the town centre which happen every month. Also this year before lockdown we had a light festival with lanterns and lights around the fountain. They added some little extra fountains for the festival.
