# Data Breach Response Policy

## **School Vision:**

'To create a positive and inspiring community that nurtures each individual and empowers leaders for life.'

## **School Mission Statement:**

'Nurturing Potential, Inspiring Minds, Changing Lives'

## **School Values:**

- Ambition and Leadership
- Kindness and Supportiveness
- Respect and Honesty
- Determination and Resilience

## **1. Introduction:**

**1.1** Applecroft School has implemented appropriate technical and organisational measures to avoid data security breaches. However, in the event that a data security breach happens, we recognise that it is important that the School is able to detect it and react swiftly and robustly in order to mitigate any risks to data subjects and to comply with our obligations under the UK General Data Protection Regulation ('UK GDPR').

**1.2** This Data Breach Response Plan sets out how we will respond to any suspected or actual data breaches and should be read alongside our Data Protection Policy and our Data Security Policy.

**1.3** The UK GDPR requires the School to report 'notifiable breaches' without undue delay and, where feasible, not later than 72 hours after having become aware of it. Notification of a breach is required unless it is unlikely to result in a risk to the rights and freedoms of individuals. In the event that a report is not made within 72 hours, the School is required to provide the reasons for the delay in reporting it to the ICO.

**1.4** If there is deemed to be a "high risk" to the rights and freedoms of individuals following a personal data breach, the School is also required to notify the individuals affected by the breach. However, in the interests of transparency, the School recognises that on some occasions it will be appropriate to notify affected individuals, even if we are not legally obliged to do so.

**1.5** If the School fails to report a notifiable personal data breach, the School is at risk of receiving a sanction from the ICO, which may include a fine. Aside from the desire to avoid receiving any sanctions, the purpose of this Data Breach Response

Plan is to ensure that the School protects the Personal Data of its stakeholders and minimise any risks to them following a breach.

**1.6** The School will ensure that staff are aware of and are trained on this Data Breach Response Plan to ensure it is effective should a data security incident occur. In particular, the Data Breach Response Team (comprising of the DPO and DPO Team members) must receive training on their roles and responsibilities should a breach occur. Further details of our security procedures are set out in our Data Security Policy.

**1.7** The School relies on all staff to be alert to the risk of data security breaches and to follow the procedures set out in this Data Breach Response Plan to ensure that they can react promptly in the event that a breach or suspected breach occurs. Any member of staff who becomes aware of a suspected or actual personal data breach must follow the escalation procedures set out below. Failure to comply with these procedures may result in a disciplinary issue.

The School's DPO is Mrs Odette Coe, Finance & Business Manager at Applecroft School, [admin@applecroft.herts.sch.uk](mailto:admin@applecroft.herts.sch.uk)

Please see the Glossary at the end of this policy for definitions of key terms.

## **2. What is a personal data breach?**

**2.1** The legal definition of a personal data breach is, "a breach of security leading to the accidental or unlawful destruction, loss, alteration, unauthorised disclosure of, or access to, personal data transmitted, stored or otherwise processed."

**2.2** A data security breach covers more than the simple misappropriation of data and may occur through incidents, such as:

- 2.2.1** Loss or theft of data or equipment;
- 2.2.2** People gaining inappropriate access to personal data;
- 2.2.3** A deliberate attack on systems;
- 2.2.4** Equipment failure;
- 2.2.5** Human error;
- 2.2.6** Acts of God/natural disasters (for example, fire or flood);
- 2.2.7** Malicious acts such as hacking, viruses or deception.

## 2.3 Examples of common personal data breaches include:

- 2.3.1 Sending an email to the wrong recipient;
- 2.3.2 Losing a USB stick which contains personal data;
- 2.3.3 Having a laptop stolen which contains personal data;
- 2.3.4 Sending a letter or email to the wrong address;
- 2.3.5 Network, phishing, malware or other cyber security incidents.

Breaches can be categorised according to the following three well-known information security principles:

- **“Confidentiality breach”** - where there is an unauthorised or accidental disclosure of, or access to, personal data;
- **“Integrity breach”** - where there is an unauthorised or accidental alteration of personal data;
- **“Availability breach”** - where there is an accidental or unauthorised loss of access to, or destruction of, personal data.

Depending on the circumstances, a breach can relate to the confidentiality, integrity and availability of personal data at the same time, as well as any combination of these.

A breach will always be regarded as an availability breach when there has been a permanent loss of, or destruction of, personal data.

2.4 A security incident resulting in personal data being made unavailable for a temporary period is also a type of breach, as the lack of access to the data could have a significant impact on the rights and freedoms of data subjects, for example, if the School's IT system goes down. This type of breach should be recorded in the School's Data Breach Log set out in Appendix 1 so that records of all such incidents are kept. However, depending on the circumstances of the breach, it may or may not require notification to the ICO and communication to affected individuals.

2.5 Where personal data is unavailable due to planned system maintenance being carried out, this should not be regarded as a 'breach of security'.

## **3. Understanding the risk to the rights and freedoms of individuals**

3.1 A breach can potentially have a number of consequences for individuals, which can result in physical, material, or non-material damage. This can include loss of control over their personal data, limitation of their rights, discrimination, identity

theft or fraud, financial loss, unauthorised reversal of pseudonymisation, damage to reputation, and loss of confidentiality of personal data protected by professional secrecy. It can also include any other significant economic or social disadvantage to those individuals.

**3.2** When assessing the risk to individuals, the Data Breach Response Team must consider the following factors:

- 3.2.1** the type of breach;
- 3.2.2** the nature, sensitivity, and volume of personal data;
- 3.2.3** ease of identification of individuals;
- 3.2.4** severity of consequences for individuals;
- 3.2.5** special characteristics of the individual;
- 3.2.6** special characteristics of the data controller; and
- 3.2.7** the number of affected individuals.

#### **4. Timescales for reporting a breach**

**4.1** The School is required to report a notifiable breach without undue delay and, where feasible, not later than 72 hours after having become aware of it.

**4.2** It is likely that the School will be deemed as having become "aware" of a breach when it has a reasonable degree of certainty that a security incident has occurred which has led to personal data being compromised. The UK GDPR expects the School to ascertain whether all appropriate technological protection and organisational measures have been implemented to establish immediately whether a personal data breach has taken place. This puts an obligation on the School to ensure that they will be "aware" of any breaches in a timely manner so that they can take appropriate action.

**4.3** While some breaches may be obvious, in other cases the School may need to establish whether personal data has been compromised. In such circumstances, the DPO will investigate promptly in accordance with the procedures below to determine whether a breach has happened which, in turn, will enable the School to decide if remedial action is needed and if the breach needs to be notified to the ICO and the affected data subject(s).

**4.4** It is possible that the School may not have established all of the relevant facts following a data security breach or completed an investigation within 72 hours.

However, in the event that the DPO determines that a breach has taken place that needs to be notified to the ICO, a report should be made within 72 hours with the information held at that point in time. In these circumstances, the report to the ICO should explain that further information will be provided as and when it is available.

**4.5** It is possible that some breaches may come to the attention of a member of staff or may be flagged up by the School's IT systems. However, it is also possible that the School may be notified about breaches by third parties, such as the people who are affected by the breach, a data processor or by the media.

**4.6** In the event that the DPO investigates a suspected breach and concludes that no actual breach has occurred, the Data Breach Log in Appendix 1 must still be completed so that the School can keep records of 'near misses' or other weaknesses in the School's systems and procedures in order to continuously review and improve processes.

## **5. Response Plan**

This Response Plan has been drafted on the assumption that the DPO is internally appointed by the organisation.

**5.1** A member of staff within the School who becomes aware of a suspected or actual data security breach must inform the DPO by email without delay. The email address for contacting the DPO is [admin@applecroft.herts.sch.uk](mailto:admin@applecroft.herts.sch.uk) and the email account should be regularly reviewed by the DPO. The Headteacher of the School should be copied in to the email to the DPO.

**5.2** If a member of staff is unsure of whether a breach has happened, the above procedures must still be followed without delay so that the incident can be investigated in order to establish whether a breach has occurred and, if so, whether it needs to be notified to the ICO or the data subjects.

**5.3** The DPO will then be responsible for assessing whether the breach or suspected breach needs to be formally escalated. If the DPO decides not to escalate it, the Data Breach Log in Appendix 1 must be completed as accurately as possible, including the reasons why the incident does not need to be escalated.

**5.4** If the DPO decides to escalate a breach or suspected breach, they must do so without delay. Where possible, the Data Breach Log in Appendix 1 must be completed with as much information as possible.

**5.5** Once a breach or suspected breach has been reported to the DPO, the DPO must commence an investigation and assess whether there is sufficient information to identify the next steps. The purpose of the investigation is to:

- 5.5.1** establish if a breach has happened;
- 5.5.2** establish the nature and cause of the breach;
- 5.5.3** establish the extent of the damage or harm that results or could result from the breach;
- 5.5.4** identify the action required to stop the data security breach from continuing or recurring; and
- 5.5.5** mitigate any risk of harm that may continue to result from the breach.

**5.6** The DPO may also need to speak to the member of staff who first reported the breach or suspected breach.

**5.7** During the course of the investigation, the DPO should consider whether to involve other members of the DPO Team.

**5.8** If the DPO decides to involve the DPO Team, DPO team members should be copied into email correspondence and provided with regular updates on the investigation and response to the incident.

**5.9** If the DPO is unavailable for any reason, for example, the DPO is on annual leave, on sickness absence or is otherwise not available to respond to the data breach, then the DPO Team must fulfil the responsibilities of the DPO set out in this Data Breach Response Plan.

**5.10** If the DPO decides to involve the Data Breach Response Team, all individuals should be copied into email correspondence and provided with regular updates on the investigation and response to the incident.

**5.11** The DPO and Data Breach Response Team should take steps to identify any risks arising from the personal data breach:

- 5.11.1** Consider obtaining specialist legal advice;
- 5.11.2** Confirm the amount, sensitivity and type of information in question;
- 5.11.3** Identify what security measures were in place when the breach occurred as well as what measures have been put in place following it;

**5.11.4** Confirm who has been put at risk and assess the potential harm resulting from the breach;

**5.11.5** Consider the additional consequences of the breach including loss of reputation, loss of business, liability for fines or contractual breaches.

**5.12** The DPO should consider whether input is required from the School's IT, HR or any other team in order to further investigate the incident, including the extent of the incident and whether any steps need to be taken to contain any breach. As the School has external HR and IT support, the relevant contact details are set out in Appendix 2.

**5.13** Depending on the circumstances, the DPO should also consider whether the School's Insurers/Risk Protection Arrangement should be notified in accordance with policy terms, whether legal advice is required and if the incident needs to be reported to the Police. The DPO should also consider if specialist IT support is required in order to contain and manage a breach and whether the Headteacher should be engaged if it is likely that the School will need to communicate internally and / or externally with stakeholders regarding the breach or suspected breach. The contact details for the organisations referred to in this paragraph are set out in Appendix 2.

**5.14** If the breach or suspected breach was caused by the School's Data Processors, the DPO must liaise with the Data Processor to obtain as much information as possible about the extent of the incident and any steps being taken to mitigate any risk to data subjects. It remains the School's responsibility to decide whether to report any such breach to the ICO within 72 hours.

**5.15** The same requirement applies if the breach or suspected breach is reported to the School by a joint Data Controller though in this case the School needs to establish with the joint Data Controller who is going to report the breach to the ICO and the data subjects if such notification is required.

**5.16** Depending on the timescales as to when a member of staff originally became aware of a breach, the DPO must be mindful of the requirement to notify the ICO without delay and within 72 hours unless it is unlikely to result in a risk to the rights and freedoms of individuals. As stated above, it is therefore possible that a data security breach may need to be reported to the ICO before the School has fully investigated or contained the breach. A report to the ICO must contain the following information:

**5.16.1** the nature of the personal data breach including where possible, the categories and approximate number of data subjects concerned;

- 5.16.2 the name and contact details of the DPO or other contact point where more information can be obtained;
- 5.16.3 the likely consequences of the personal data breach;
- 5.16.4 the measures taken or proposed to be taken by the School to address the personal data breach, including, where appropriate, measures to mitigate its possible adverse effects.

5.17 The DPO is not required to provide precise details in the report to the ICO if this information is not available and an updated report can be made as and when further details come to light. Such further information may be provided in phases without undue further delay. The DPO should inform the ICO if the School does not yet have all the required information and if further details will be provided later on.

5.18 If a follow-up investigation uncovers evidence that the security incident was contained and no breach actually occurred, this information could then be added to the information already given to the ICO and the incident recorded accordingly as not being a breach. There is no penalty for reporting an incident that ultimately transpires not to be a breach.

5.19 In the event that a notifiable breach is not reported to the ICO within 72 hours, a report should be made without delay with the reasons for the delay.

5.20 If the DPO concludes that a referral to the ICO is required and also concludes that there is likely to be a high risk to the rights and freedoms of individuals resulting from the data security breach, then the data subjects affected by the breach must also be notified without undue delay. The DPO must liaise with the DPO Team and the Headteacher in relation to how the issue should be communicated to the relevant stakeholders. The DPO will need to consider what is the most appropriate way to notify affected data subjects, bearing in mind the security of the medium as well as the urgency of the situation. The notice to the affected individuals should contain the following information:

- 5.20.1 description of the nature of the breach;
- 5.20.2 the name and contact details of the DPO or other contact point;
- 5.20.3 a description of the likely consequences of the breach; and
- 5.20.4 a description of the measures taken or proposed to be taken by the School to address the breach, including, where appropriate, measures to mitigate its possible adverse effects.

5.21 If the DPO decides to notify data subjects about a breach, the notification should at the very least include a description of how and when the breach occurred

and what data was involved. Details of what the organisation has already done to respond to the risks posed by the breach should also be included. The School should also, where appropriate, provide specific advice to individuals to protect themselves from possible adverse consequences of the breach, such as resetting passwords in the case where their access credentials have been compromised.

**5.22** Particular consideration will be given to whether there are any parties that we are legally or contractually obliged to notify (e.g. insurers, regulator).

**5.23** The DPO must complete the Data Breach Log in Appendix 1 before making the referral to the ICO and keep it under review as and when further information comes to light.

**5.24** In certain circumstances, where justified, and on the advice of law-enforcement authorities, the School may delay communicating the breach to the affected individuals until such time as it would not prejudice such investigations. However, data subjects would still need to be promptly informed after this time.

**5.25** Even if the DPO initially decides not to communicate the breach to the affected data subjects, the ICO can require the School to do so, if it considers the breach is likely to result in a high risk to individuals.

**5.26** In the event that the DPO concludes that it is not necessary to refer the breach to the ICO, the DPO must still complete the Data Breach Log in Appendix 1 and clearly set out the reasons why the DPO is satisfied that a referral is not required. The DPO must keep the decision under review and be prepared to make a referral to the ICO if any circumstances change or if any information comes to light which means that a referral should be made.

**5.27** Once the breach has been contained and action taken to stop or mitigate the breach, the DPO must then review the incident and identify any steps which need to be taken in order to prevent a similar breach occurring in future. This may also include whether any disciplinary action is required against any members of staff or pupils.

**5.28** As part of the review process, the DPO should undertake an audit which should include a review of whether appropriate security policies and procedures were in place and if so, whether they were followed. The audit should include an assessment of any ongoing risks associated with the breach and evaluate the School's response to it and identify any improvements that can be made. The review should also consider the effectiveness of this Data Breach Response Plan and whether any amendments need to be made to it.

**5.29** Where security is found not to be appropriate, the DPO should consider what action needs to be taken to raise data protection and security compliance standards and whether any staff training is required.

**5.30** Where a data processor caused the breach, the DPO should consider whether adequate contractual obligations were in place to comply with the GDPR and if so, whether the data processor is in breach of contract.

## **6. School Holidays**

**6.1** The School recognises that there are times throughout the year when their ability to identify and respond to a breach swiftly and robustly may be impeded because the School has limited staff available during school holidays. A breach may still occur during these periods and we will implement the following steps to mitigate any risk caused if a breach happens during the school holidays:

- 6.1.1** The DPO's email address will be made available to staff and is available on the School's website and in the School's Privacy Notices so that a member of staff can be contacted should an incident occur. This email address will be monitored regularly by the assigned member of staff.
- 6.1.2** The DPO will have the contact details for the Headteacher, the School's IT Team, legal advisers and insurers so that action can be taken without delay should a breach occur.
- 6.1.3** The DPO should follow the steps set out above as best as they can in the circumstances. In particular, this should include reporting notifiable breaches to the ICO within 72 hours and, if required, the affected data subjects. The report to the ICO should state that the School has limited staff available due to the school holidays and, depending on the circumstances, advice should be sought from the ICO on the steps the School should take to mitigate any risks.

## **7. Review**

**7.1** This Data Breach Response Plan will be kept under review by the DPO and may be revised to reflect good practice or changes to our organisational structure.

## Appendix 1 - Data Breach Log for Applecroft School

This Data Breach Log must be completed by a suitably trained person following any reports of a security breach or suspected breach involving personal data. Staff must follow the School's Data Breach Response Plan following notification of a breach or suspected breach. In the event you are unsure whether to notify the ICO and the data subjects, you should obtain legal advice without delay as the ICO must be informed about notifiable breaches within 72 hours.

| <b>Information</b>  | <b>Response</b> |
|---|-----------------|
| <b>Date and time this record was completed</b>  |                 |
| <b>Name of person completing this record</b>  |                 |
| <b>General description of the breach</b>  |                 |
| <b>Name and job title of person who originally reported the breach / suspected breach</b>   |                 |
| <b>Date and time the breach / suspected breach was reported</b>   |                 |
| <b>Who was the breach / suspected breach reported to?</b>   |                 |
| <b>Has the Data Protection Officer been informed?</b>   |                 |

| Information  | Response |
|--|----------|
| response to this question is likely to be a summary as a more detailed report / audit is likely to be required following a data breach which is notified to the ICO. |          |

**Appendix 2 - Contact details for external organisations who may be involved if there is a data security breach.**

HR Providers - Stone King - 01223 612072  
 Payroll Providers - HCC - 01992 556500  
 Risk Protection Policy - Zurich - 0800 783 0692  
 External IT Providers - HFL - 01438 844777

**Appendix 3 - Glossary of Terms**

|   |   |
|---|---|
| Biometric Data                          | Personal Data resulting from specific technical processing relating to the physical, physiological or behavioural characteristics which allow or confirm the unique identification of that person, such as fingerprints.            |
| Consent                                 | Any freely given, specific, informed and unambiguous indication of the Data Subject's wishes by which they, by a statement or by a clear affirmative action, signify agreement to the Processing of Personal Data relating to them. |
| Data Controller                         | Exercises overall control over the purposes and means of the Processing of personal data.   |
| Data Processor                          | Acts on behalf of, and only on the instructions of, the relevant Controller.  |
| Data Protection Officer (DPO)           | Monitors internal compliance of an organisation, informs and advises on data protection obligations.  |
| Data Subject                            | Data Subjects for the purpose of this policy include all living individuals about whom we hold Personal Data.   |
| Data User                               | Data Users include employees, volunteers, Trustees whose work involves using Personal Data.   |
| Information Commissioner's Office (ICO) | Independent public body responsible for ensuring compliance with the UK's data protection regulations by providing guidance, investigating breaches of the regulations and dealing with complaints.                                 |
| Parent                                  | Parent has the meaning given in the Education Act 1996, and includes any person having parental responsibility or care of a child   |

|                              |  |
|------------------------------|--|
| Personal Data                | Any information relating to an identified or identifiable natural person, which could be as simple as a name or a number, or which could include other identifiers e.g. date of birth, photo, IP address etc.  |
| Personal Data Breach         | A breach of security leading to the accidental or unlawful destruction, loss, alteration, unauthorised disclosure of, or access to Personal Data.  |
| Privacy by Design            | Implementing appropriate technical and organisational measures in an effective manner to ensure compliance with the GDPR   |
| Processing                   | Any operation which is performed on Personal Data, such as collection, recording, organisation, structuring, storage, adaptation or alteration, erasure or destruction.  |
| Special Category Data        | Personal Data revealing or concerning racial or ethnic origin, political opinions, religious or philosophical beliefs, trade union membership, genetic data, biometric data (where used for identification purposes), health and sexual orientation. |
| Subject Access Request (SAR) | A formal request from a data subject for information, including Personal Data, which an organisation holds about them.   |
